- Heated Seat
- Warm Air Dry
- Dual Nozzles System
- Easy Convenient Control
- Feminine Wash Reservoir
- Hydraulic Cover and Seat
- Water Temperature Control
- Self-Cleansing/Anti-blocking
- Soothing Pulsating Massage
- Adjustable Water Pressure Control

SDL are now able to supply the latest Electronic Bidet Toilet Seat System, bringing a new concept to your bathroom sanitation and revolutionising the way you would normally clean.

The Electronic Bidet is a luxury toilet seat that provides a complete, hygienic wash and dry cycle with a gentle massage action. It eliminates the need for toilet paper.

The elegantly styled unit converts a standard toilet into a multi function, fully controllable bidet.

A simple to use control panel allows you to personalise hygienic functions including water, air stream and seat temperature.

Twin nozzles allow for the ultimate in cleanliness and comfort whilst the odour extraction function reduces embarrassing odours.

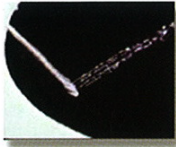

*Call our office today to find out more information about how the
Electronic Bidet Toilet Seat System can benefit you!*

Supreme Bidet Multi features

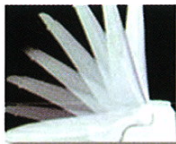

Wash
Hygienic cleaning function for the user.

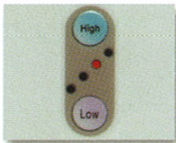

Feminine wash reservoir
A special purpose spray nozzle gently blows out warm water for feminine hygiene.

Warm air dry
The drying function blows out warm air for drying.

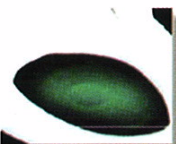

Hydraulic cover and seat
To avoid damage the hydraulic seat design allows the cover and seat to close slowly.

Air dryer temperature control
The user can adjust the temperature accordingly.

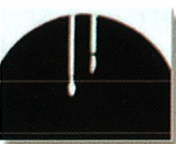

Intelligent seat sensor
An automatic sensor is activated when a user sits on the seat.

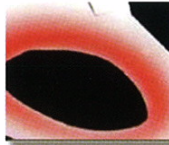

Deodoriser
A special deodoriser process eliminates smells.

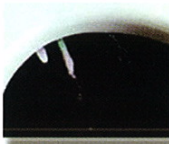

Adjustable seat temperature
The user can adjust the seat temperature accordingly.

Dual nozzles
The two nozzles can clean in different areas.

Heated Seat
The seat can be set to automatically maintain a warm temperature throughout winter.

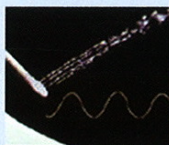

Anti-blocking
Clear water blows out from the sides of the nozzles at the start and end of flushing, which will automatically clean the nozzles.

Adjustable water temperature
The user can adjust the water temperature accordingly.

Premium Bidet Multi functions plus extra features

The water spray head moves forwards and backwards for flexible cleaning.

Energy saving
The function keeps water at a suitable temperature to allow energy saving.

Position regulation
Users can easily adjust the direction of the water spray to allow for different body shapes and posture.

Soothing pulsation massage

A massage effect is produced by rhythmic seismic motion of the water spray.

Built in filter
Filter prevents system from lime build up.

Auto checking
Automatic system checking.
