

Curved Rail  
Indoor Stairlift **Elite** -Curve

**home**<sup>®</sup>  
**ADAPT**

**QUALITY STAIRLIFTS**

*The Elite Curve is unique with a superior weight capacity of 190 kilos. The solid steel rail comfortably brings the rider up the stairs.*

### ● **Safety**

*A dual braking system makes the Elite Curve one of the safest stairlifts on the market. The electromagnetic braking system is complemented by a self locking gear box, which completely ensures your safety as you travel up and down your stairs.*

*Should anything get in the way of the stairlift as you are operating it, there are safety sensors on the foot plate and the carriage that will immediately stop the lift.*

### ● **Comfort**

*The Elite Curve has the most luxurious and comfortable seat you will ever find on a stairlift.*

### ● **Convenient Installation**

*The Elite Curve is delivered fully equipped and ready for installation.*

*The unit anchors to the steps, not the wall, and the stairlift rail can be placed as close as 178 mm from the wall.*

*When the chair's seat, footrest and armrests are folded, there is plenty of room for family and guests to use the staircase unimpeded.*

# Curved Rail Indoor Stairlift **Elite** -Curve

**Rated user weight capacity: 190 kg (30 stone)**

- **Adjustable**

*This stairlift has the biggest adjustable difference between seat and footrest height of any stairlift. There are 4 settings for the seat as well as 4 settings for the footrest.*

*The space between the armrests is adjustable and can be extended by 110 mm.*

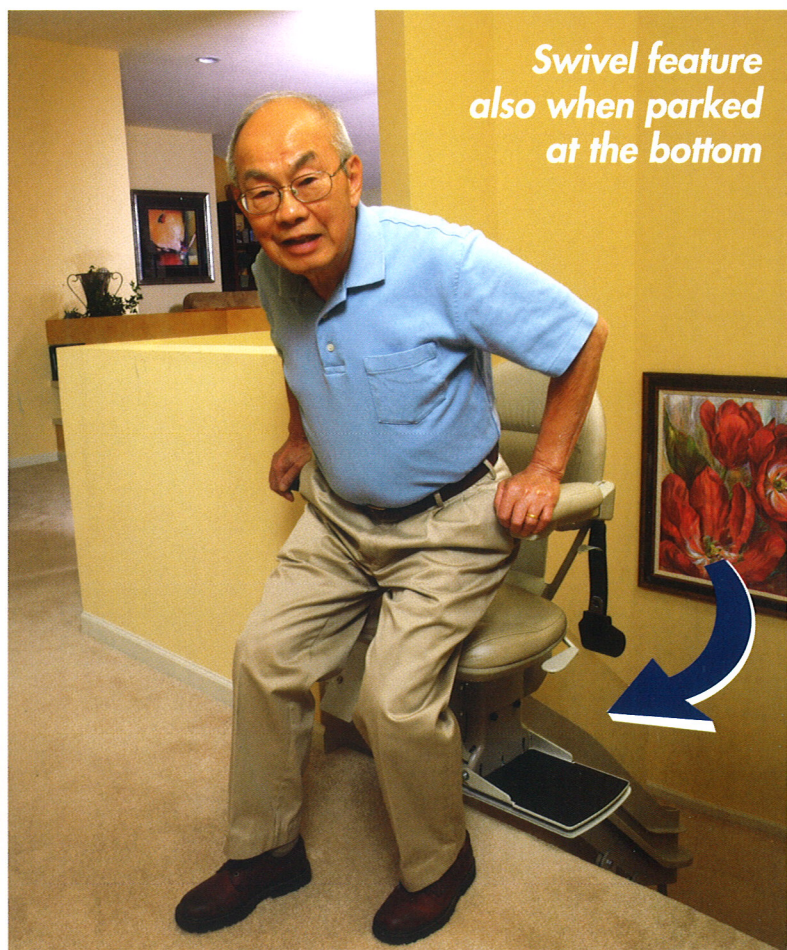

*A large seat option is available.*

- **Quiet and smooth**

*The soft start/stop feature combined with the rack and pinion drive provide a smooth ride which is exceptionally quiet. The covered gear rack gives you a clean and attractive rail.*

- **Swivel seat**

*The offset swivel seat makes the entry and exit position at the top landing safer and easier.*

***You don't have to be limited by stairs anymore,  
so enjoy the home you love, upstairs and down!***

## ● *Battery powered*

The lift uses two 12-volt batteries that are charged from the household power supply when the lift is parked at the top or bottom of the rail or at a mid park position, if ordered as an option. The Elite Curve features strip charge contacts for more flexibility when parking. You have access to your upstairs and downstairs, even if electrical service in your home is interrupted.

The two wireless call/send controls make installation simple and clean with no wires running along the wall.

## *Rail option*

The Elite Curve can be equipped with an optional top or bottom park position to facilitate an exit and remove the unit from the stairs.

## *Obstruction sensor*

The footplate and carriage safety sensors stop the lift if the slightest obstacle is in the way.

## *Clean and elegant design*

The simple, unique design of the rail hides all mechanical components, and the installation requires no modification to your staircase.

## ● **Exceptional value**

- + Rated user weight capacity: 190 kg (30 stone).
- + Manual swivel seat at the top and bottom landing. Powered swivel at top landing only.
- + Adjustable seat height and footrest height for easier exit/entry.
